Standard stitching are in on tone with the leather base, other colors
or changes are available on request.

available colors

Jade 02

H2O leather treatment

H2O is an innovative and exclusive range of leather engineered with permanent water and oil repellent treatments. Fibres with high resistence to and low uptake of moisture keep mold, mildew, stiffness and cracking away.
The added benefit of abrasion resistance and easy cleaning bring you peace of mind and an added level of ease when caring for your leather.

care & maintenance

Place leather-covered products away from the heat source.
Prolonged exposure to heat can cause leather to dry out, harden and crack.
Do not place leather-covered products in direct sunlight.
Any damage or staining may be permanent.
Keep solvents, enamels and detergents away from leather items.
Avoid all products containing solvents or oils, as they may damage the leather surface.
Dampen a soft cloth with the appropriate product and clean the item regularly. Aniline leathers are very absorbent and may require more frequent cleaning.
